# Full Stack Developer

The Archdiocese of Malta is seeking to recruit a Full Stack Developer on a full-time basis. The successful applicant will report to the Digital Development Manager and will be responsible for designing, coding, and modifying front-end web architecture, from layout to function and according to the specifications, as well as integrating data from various back-end services and databases.

The ideal candidate must:

- Have a qualification in ICT, Computer Science, or relevant field.

- Be experienced in back-end programming languages (PHP – with Laravel Framework – is required, while Python, NodeJS or similar will be considered an asset).

- Be experienced in designing and developing mobile applications.

- Be experienced with developing and integrating Restful API.

- Be experienced with MariaDB / MySQL and NoSQL databases.

- Be experienced in Linux server configuration (including LAMP stack, DNS, Mail, familiarity with shell commands).

- Have a good command of HTML, CSS and Javascript (including JQuery and Vue.js).

- Be familiar with the WordPress ecosystem.

- Have knowledge of code versioning tools (git).

- Have excellent understanding of the software development life cycle. Experience with agile or iterative methodologies will be considered an asset.

- Possess strong problem-solving skills.

- Have excellent oral and written communication skills in Maltese and English.

- Be meticulous and attentive to detail.

- Be able to work on his/her own and show initiative.

Interested persons are to submit the following to hr@maltadiocese.org by not later than 20 May 2024:

- A letter of application

- A detailed copy of their CV

- A scanned copy of certificates

- Names and emails of two referees
