

## **Junior Full Stack Developer (with Data Analyst Duties)**

The Archdiocese of Malta is seeking to recruit a Junior Full Stack Developer (with Data Analyst duties) on a full-time basis. The successful applicant will report to the Digital Development Manager and will be responsible for designing, coding, and maintaining websites and custom implemented systems. Additionally, s/he will be collecting and analysing data to identify trends which the Archdiocese of Malta can use to improve its message, operations, and services.

The ideal candidate must:

- Have a tertiary level qualification (EQF Level 6) in an area such as ICT, Computer Science, Mathematics, Statistics or Information Management. A qualification in Data Science or Artificial Intelligence will be considered as an asset.
- Have a good command of HTML, CSS and Javascript (including JQuery and Vue.js); PHP (including Laravel framework) and Python; and MariaDB / MySQL and NoSQL Databases.
- Have good knowledge of: Linux server configuration (LAMP stack, DNS, Mail, familiarity with shell commands); development and integration with Restful APIs; and code versioning tools (Git).
- Be familiar with the WordPress ecosystem.
- Have at least 2 years' experience in a similar role, including experience related to data analysis.
- Be knowledgeable of statistics and experience using statistical packages for obtaining and analyzing data, including data from primary or secondary data sources such as Google Analytics, Facebook insights (Graph API) etc.
- Be able to analyse large datasets, identify correlations and patterns to make accurate conclusions and predictions, and to produce comprehensive reports in written and visual format.

Interested persons are to submit the following to [hr@maltadiocese.org](mailto:hr@maltadiocese.org) by not later than 20 May 2024:

- A letter of application
- A detailed CV
- A scanned copy of certificates
- Name and email address of two referees
