

Full Stack Developer

The ideal candidate must:

- possess a qualification in ICT, Computer Science, or relevant field
- have a good command of HTML, CCS and Javascript
- be experienced in back-end programming languages (PHP is required, while Python, Ruby, GO, NodeJS or similar will be considered an asset)
- have experience working with advanced JavaScript libraries and frameworks (jQuery is required, while VueJS, Angular, React or similar will be considered an asset)
- have experience in designing and developing mobile applications
- have experience in developing and integrating Restful API
- have experience with MariaDB / MySQL and NoSQL databases
- have experience in Linux server configuration (including LAMP stack, DNS, Mail, familiarity with shell commands)
- be familiar with the WordPress ecosystem
- have knowledge of code versioning tools (e.g. Git, Mercurial or SVN)
- have excellent understanding of software development life cycle, while experience with agile or iterative methodologies will be considered an asset
- possess strong problem-solving skills
- be meticulous and attentive to detail
- be able to work on his/her own and show initiative
- be able to communicate excellently (written and verbally) in the English language, whilst fluency in Maltese will be considered an asset.

The successful candidate will report to the Digital Presence Director and will be responsible for designing, coding and modifying front-end web architecture, from layout to function and according to the specifications, as well as integrating data from various back-end services and databases.

Interested persons are to submit the following to hr@maltadiocese.org:

- A letter of application
- A detailed copy of their CV
- A scanned copy of certificates
- Name and email address of two referees

Short-listed applicants will be required to complete an online technical assessment.
